

JCCS
Japan CCS Co., Ltd.

**Large Scale CCS Demonstration Project in Tomakomai, Hokkaido, Japan
Commencement of CO2 Injection Operations**

April 1 2016

Japan CCS CO., Ltd. (JCCS) is pleased to announce that it has been commissioned by the Ministry of Economy, Trade and Industry to undertake the Tomakomai CCS Demonstration Project in FY2016, following the same in FY2012.

JCCS has been engaged in the preparation of CO₂ separation, capture and injection facilities in Tomakomai City in Hokkaido for the past four years since 2012, completing all of the facilities in October 2015 and finishing a test run by February, 2016.

As a result of the said commission, we are scheduled to commence actual operation and injection work at these facilities as follows:

April 4 (Mon): Scheduled date to commence receipt of gas containing CO₂

April 6 (Wed): Scheduled date to commence CO₂ injection into subsea formation

Additionally, we will be constantly monitoring the behavior of the injected CO₂ by using three observation wells, an OBC (Ocean Bottom Cable), four OBSs (Ocean Bottom Seismometers), and a high sensitivity onshore seismometer, installed as part of the FY2012 Tomakomai CCS Demonstration Project work.

JCCS is planning on injecting over 100,000 tons of CO₂ per year.
